SUMMARY

AEM Developer with 4.6 years of experience in **AEM on-premise** and **AEMaaS**, skilled in frontend (**HTML5, CSS3, SASS, JS, HTL, React**) and backend (**Java, Sling Models, OSGi, Servlets, workflows, schedulers**) development. Experienced in **headless** AEM architecture, **Content Experience Fragments, REST APIs**, and integrations with **AEP, Adobe Launch**, Adobe Target, and Adobe Analytics. Proficient in **Dispatcher** configuration, **MSM** rollout, **DAM** management, **CI/CD** pipelines, **AEM Edge Deliver Services** and advanced **troubleshooting/debugging**.

SKILLS

Programming Languages	Java, JavaScript, Python, C,C++
Front-End Technologies	HTML, CSS, SASS, Slightly/HTL, jQuery, ReactJS
Backend and Server-side	JSP, Servlets, OSGi, Sling Models, JUnit, RESTful APIs
Development tools	Maven, IntelliJ IDEA, VS Code, Eclipse, Git, Jenkins, CI/CD Pipelines, Azure Boards

EXPERIENCE

Senior AEM Developer, Infosys Limited
Coca-cola Project

Aug 2024 - Present
Hyderabad

- Developed scalable backend modules using **Java, Sling Models, OSGi** services, Sling **Servlets**, and **Context-Aware Configurations**, ensuring a modular, cloud-ready architecture in AEMaaS.
- Built reusable content structures using **Content Fragments** and **Experience Fragments**, enabling omnichannel publishing through **Headless AEM**, GraphQL APIs, and RESTful endpoints.
- Integrated third-party systems through **REST APIs**, implemented **JSON Exporter** with Sling Models, and optimized headless responses for high-performance consumption by web and mobile apps.
- Automated business processes by writing **Custom Workflows**, custom workflow steps, process implementations, and workflow **launchers** with configurable behavior.
- Set up **Dispatcher** rules, caching/invalidation strategies, filter rules, cache-busting configurations, and mapped rewrite rules to optimize content delivery and reduce load on publish instances.
- Enhanced reliability through Sling **Event Handlers**, Event Listeners, **Schedulers**, and job-based processes for asynchronous content management tasks.
- Integrated **Adobe Experience Platform** (AEP), Adobe Launch, Adobe Target, and Adobe Analytics into AEM, enabling data-driven personalized content experiences, audience segmentation, and performance tracking.
- Collaborated with **UX/UI** designers in **Figma** to convert design mockups into responsive AEM components, ensuring consistent experiences across all devices and platforms.
- Gained hands-on exposure to **AEM Edge Delivery Services**, understanding content source setup, universal editor workflows, and key concepts for achieving high-performance, edge-optimized content delivery.

AEM Developer, Tata Consultancy Services
Virgin Atlantic Airways Project

July 2021 - Aug 2024
Hyderabad

- Developed **Custom components** and extended **OOTB components** using **HTL, HTML5, CSS3, SASS**, and **JavaScript** to deliver dynamic, reusable, and author-friendly UI functionality.
- Built **Editable Templates** by configuring structure components, initial content, and **template policies**, enabling consistent design governance and flexible page creation for content authors.
- Worked on building **Touch UI dialogs** with validations, creating and optimizing **client libraries** for efficient CSS/JS loading, and integrating the **Style System** to maintain consistent UI design.

- Managed the on-prem/AMS author-publish-dispatcher setup, handled replication, activations, cache invalidations, and environment-level troubleshooting to ensure content synchronization and system health.
- Assisted in configuring **DAM** workflows, asset folder structures, and metadata schemas, improving asset accessibility and usage across teams.
- Ensured **WCAG** and **ADA** compliance by developing accessible components, implementing best practices for web content accessibility, and conducting testing to provide good experience across all devices and platforms.
- Provided support by **troubleshooting**, **debugging**, and resolving AEM performance issues, synchronization, and rendering challenges, ensuring smooth deployment and optimal user experience.
- Improved system stability by analyzing JVM heap dumps, optimizing memory usage and enforcing code quality and security with **SonarQube** and **CodeQL** in CI/CD pipelines.
- Actively participated in **client-facing meetings**, gathering requirements and ensuring alignment with objectives, demonstrating strong **communication skills** for translating client needs into requirements.

EDUCATION

Bachelor of Computer Science, Bapatla Engineering College 2017 - 2021
Relevant Coursework: Algorithms, Object-Oriented Programming (OOP), Web Technologies, AI Machine Learning

Intermediate, Mathematics and Computers, Jawahar Navodaya Vidyalaya 2015 - 2017
Relevant Coursework: DataStructures, DBMS, C/C++, Core Java

CERTIFICATIONS

- Adobe Certified Professional - Adobe Experience Manager Sites for Developers
- Generative AI: Introduction and Applications – IBM
